

## OBJECTIVE

// While I have accumulated experience across virtually every position in the design world from grunt to art director, I am ready and willing to step in wherever needed and play an integral role within a creative team. Strong design must convey the essence of its subject and evoke the appropriate emotive response while never losing sight of the functional objective - my ballast as a creative. //

## SKILLS

## EXPERIENCE

### SoCap Agency Lead Designer + Art Director Jan 2017 - July 2022

Known as "Social Capital Agency", we cover everything from design, production, PR, consulting and digital marketing. As a partner and founding member, I was given the opportunity to really own my role and be a leader. Before long I was a central fixture of customer relations on all levels as well as directing small creative teams across disciplines.

A typical scope of work within an account begins with initiating the brand through an extensive research and analysis phase in conjunction with the execution of the logo design package. From there we focus on creation of collateral in all forms and how it will integrate with the overall campaign along with UI and UX design of the website. I have worked with some very high profile companies as well as independent, obscure "pet-projects"... much of which you just can't make up.

### Charles F. Bolden Group Creative Director + UI/UX Lead Aug 2022 - Jan 2024

CFBG is the parent company for several subsidiaries in the space/aerospace, national security and technology sectors. I was the conduit of translating the personality of each entity into distinct yet cohesive brands along with all supporting creative media. It was an honor to work with/for the man that captained the Hubble Telescope launch, Charles F. Bolden Jr.!

### Aqueous FinTech Chief Information Architect Jan 2020 - Nov 2021

It was my responsibility to aggregate all of the parameters around what the platform needed to include as it related to interoperable, multi-jurisdictional compliance in the global economy and map out how this would translate to a user friendly application interface.

### Simansons Design Freelance Designer Sept 2012 - Present

I am the sole designer and proprietor, responsible for every phase of operations. This encompasses contract and budget to concept, execution and roll-out. I have worked with a very wide variety of clientele within virtually every medium. Certainly the foundation for most of my design acumen.

### RevvedUp Digital Graphic Designer May 2016 - Oct 2016

I designed a range of promotional and informative material within the realm of digital marketing and ad-buying. This included info-graphics, iconography, website banners and multi-page whitepapers while adhering to established corporate brand guidelines.

- adobe illustrator
- adobe photoshop
- adobe indesign
- figma
- wix
- branding
- web UI/UX
- illustration
